

VEHICLE TITLES AND REGISTRATION DIVISION • AUSTIN, TEXAS 78779-0001 • (512) 465-7611

December 19, 2000

**Registration and Title Bulletin #111-00 (Revised)**

**To:** All County Tax Assessor-Collectors

**Subject:** Motorized Scooters

**PURPOSE**

To provide information on registration and titling for motorized scooters.

**DETAILS**

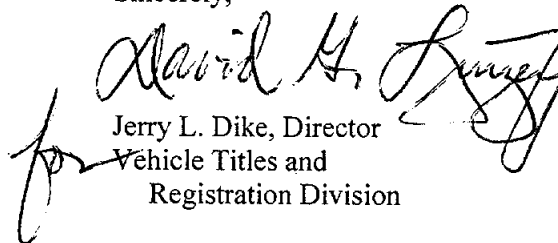

The Vehicle Titles and Registration Division (VTR) of the Texas Department of Transportation (TxDOT) recently received an inquiry on the issue of registering and titling a motorized scooter. We discussed the particular model of motorized scooter with the Traffic Law Enforcement Division and the Motor Vehicle Safety Inspection Division of the Texas Department of Public Safety (DPS). According to the description of the vehicle provided by the manufacturer, this type of vehicle will not properly pass safety inspection and therefore cannot be registered. According to §502.005 of the Texas Transportation Code, "Refusal to Register Unsafe Vehicle", these vehicles cannot be allowed to operate on a public highway.

The safe operation and safety inspection of these vehicles is a traffic and law enforcement issue. Should these vehicles eventually meet the safety equipment requirements and standards required by law, then registration and titling procedures will be established.

**VTR CONTACT PERSON(S)**

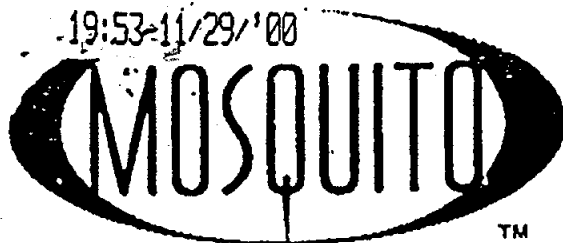

If you have any questions about this information, please contact your local VTR Regional Office. Thank you very much.

Sincerely,

  
Jerry L. Dike, Director  
Vehicle Titles and  
Registration Division

When you've got to go somewhere or just want to have fun, do it on a Mosquito DX26™!

You could be like everyone else and drive a car, ride a bike, skate board, or roller blade. But why not zip around on a Mosquito DX26™? It's a lot more fun. The Mosquito DX26™ is not just for young people either. The Mosquito DX26™ can be used by aircraft owners, students, security guards, boat owners, motor home owners, tourists, etc. They're great for parades, athletic events, roadside emergencies, newspaper carriers, messenger service, bus and train commuters, to get around warehouses, camping, rentals, farms, family recreation and much more.

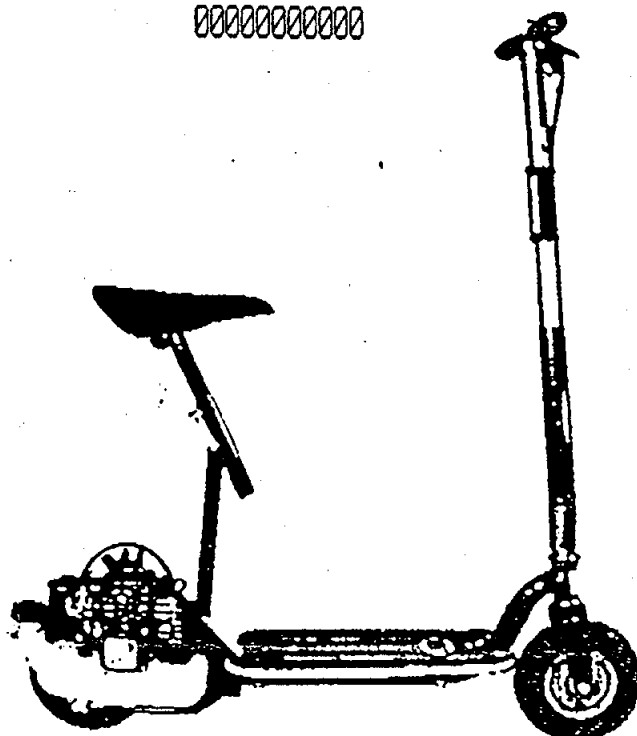

The Mosquito DX26™ will zip you around at up to 20 mph. It's easy to start and easy to ride with or without the optional seat. The Mosquito DX26™ handles like a dream. It will buzz you around and take you almost anywhere. When you get there, you fold it up and carry it with you.

#### Hot stuff about Mosquito DX26.

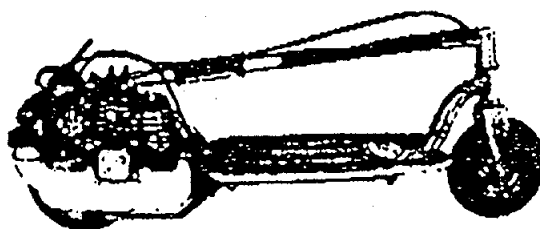

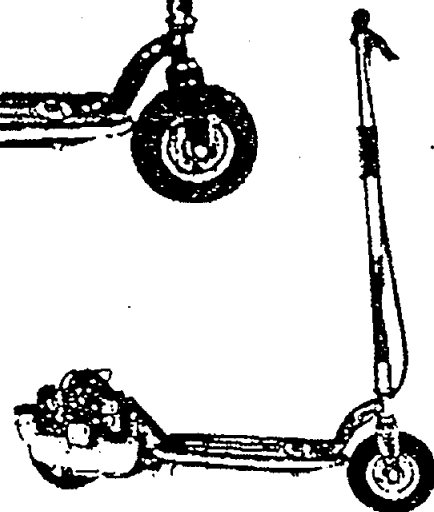

- Strong frame can support 400 lbs.
- Durable powder-coat finish in red, blue, black or yellow.
- Quiet, precision two-stroke engine (24cc, 1.2 hp)
- Pneumatic tires for the safest and smoothest ride. 1.1 liter gas tank
- Folds flat for easy storage
- Chain drive makes riding on a dirt road no problem
- Centrifugal clutch for safe smooth starting
- Rear drum brake.
- Accessories available.

The Mosquito DX26™ is cool.  
So is safety.

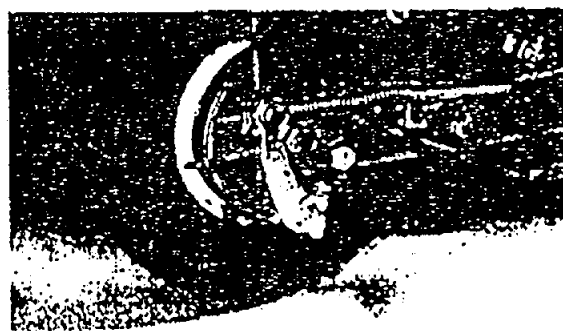

Everyone wants to have fun. But riding a Mosquito DX26™ is also serious stuff. You always have more fun when you don't get hurt. So always wear a helmet, gloves, elbow and knee pads, and of course appropriate shoes. Also, make sure to read the Mosquito DX26™ Owner's Manual for complete safety and maintenance precautions.

(Seat optional)

The Mosquito Stinger is unbelievable. The frame, including deck is all aluminum. The engine is an awesome 39.6 cc, and is of the highest quality parts available. The Stinger has a front and rear brake, and a motorcycle style throttle.

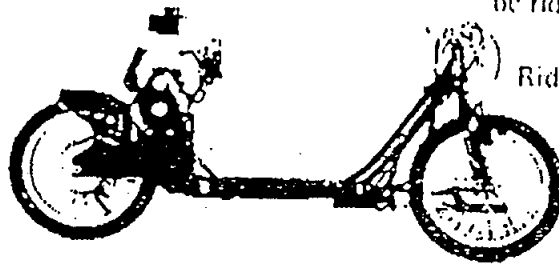

The handle bar folds and securely locks in place with a folding bicycle clamp. The handle bar can be raised or lowered for the comfort of the rider. The engine is mounted in the center over the rear wheel well for better balance. It comes with an optional seat which is secured by a quick release at the bottom and can be raised or lowered using another quick release. The seat posts are also aluminum.

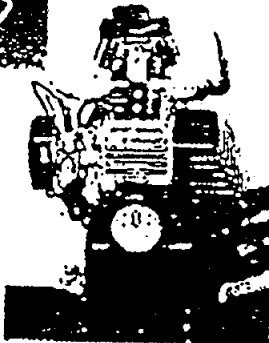

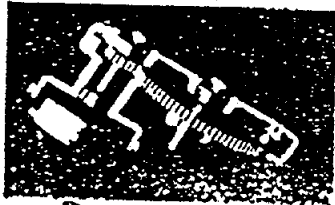

The Stinger cruises at 25 mph, and has good power for both on and off road riding. The tire size, length and ground clearance make it possible to ride the Stinger in rough terrain.

A unique gear box eliminates the need for a small chain or belt. The tire is driven by a large chain. With a large gas tank the Stinger can be ridden for hours.

Ride it!

repellent keeps this Mosquito from biting them. Everything you would want in a mini-scooter is on the Tiger Mosquito. It is the ultimate mini scooter. It will take anyone anywhere on road or off road, flat surface or up hills, wet or dry, dirt or pavement, bumps and driveway curbs, grass or firm sand, regardless of the size of the rider. Like the Mosquito DX2G, the Tiger has a centrifugal clutch, pneumatic tires and folds flat for easy storage. The similarities end there, however. The Tiger is a brand new design. Larger engine, larger tires, aluminum frame and much, much more.

The Tiger is an adult mini scooter which can also be ridden by younger riders. Fun and practical with many uses. You name it and the Tiger can do it. From recreation to road side emergencies, the Tiger is the answer.

- Named after the ferocious Tiger Mosquito, the Tiger is light, fast durable and quick
- All aluminum frame with cast aluminum rear wheel well
- The Tiger's outstanding 39.6 cc engine is the best and largest, and it out-distances the competition
- The Tiger's unique free wheel drive system makes for more fun and no drag when coasting
- Gear to gear primary drive system
- The Tiger's rear brake insures safe and quick stopping
- The Tiger's larger wheels, powerful engine and 5" ground clearance, allows it to be ridden on any terrain
- The Tiger's unique and durable handle bar folds quickly and securely.
- The Tiger's longer board makes it easier to find a comfortable and safe position for even the largest feet.
- The Tiger's optional seat fits securely, is comfortable and easy to put on or take off
- Designed by a top flight engineer, crafted with the best material available, and powered by what our engine expert calls the best 2-cycle engine made, the Tiger Mosquito cannot be repelled by the competition.
- Composite board.
- Convenient kick stand.
- Center mounted engine
- This is one mosquito you will welcome to your home.
